KUHN Axis® 20.2 W Precision Fertilizer Spreader

Kuhn North America, Inc., is pleased to introduce the new KUHN Axis® 20.2 W precision fertilizer spreader. The KUHN Axis 20.2 W offers a simple, affordable precision fertilizer spreading solution for small- to medium-sized farms and specialty operations.

Two weigh cells built into the hitch provide feedback for the rate control system and inform the operator of the quantity remaining in the hopper. Rate control via scales also eliminates the calibration test required on machines not equipped with a weighing system.

Speed Servo electric motors control the metering outlets to reduce application errors and provide Vari-Spread 8 section control. Vari-Spread 8 is a form of section control operated through the Quantron A terminal.

The Quantron A controller is easy to use and does not require a tractor with ISOBUS capability. The controller provides users with a color screen to display all the main machine functions, including application rate, ground speed, load remaining, area counter and more.

Like other spreaders in the Axis family, the slow-rotating hopper agitators and Coaxial Distribution Adjustment (CDA) system gently handles fragile materials while creating wide, precise spread patterns. The drop point is another key component of CDA. It rotates around the center of the disc, but always stays the same distance from the center of the disc. Changing the drop point changes how long the product stays on the disc, which changes the amount of energy the rotation can impart to the product.

The Axis 20.2 W is designed to be customized to the needs of each operation, offering a variety of hopper extensions, border spreading devices, and other optional equipment.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
