KUHN FC 9830 D RA Rear-Mounted Mower Conditioner with Windrow Merger

Kuhn North America is pleased to add to the lineup of FC 30 D RA Series rear-mounted mower conditioner with windrow merger with the addition of the FC 9830 D RA. Working in combination with the FC 3125 DF or FC 3525 DF front mounted machines, the FC 9830 D RA allows operators to cut and condition up to 31'10" (9.7 m) in one pass, with impressive industry-leading features KUHN customers have come to know and appreciate.

The FC 9830 D RA is ideal for operators making haylage or baleage, or custom operators looking for a mower conditioner with the added capability of merging in a single pass. However, the machine can be used solely as a mower conditioner with the windrow merger in the raised position for use in dry hay applications. The mounted windrow merge system offers operators ultimate flexibility, whether making silage or dry hay.

Operators will appreciate the intuitive ISOBUS controls, which provide seamless in-cab management of key functions such as automatic headland lifting, belt speed, merger belt functions and folding/unfolding. These features enhance productivity and ease of use in the field.

Built for durability and precision, the FC 9830 D RA features KUHN's Optidisc® Elite cutterbar, a heavy-duty, through-bolted design that is lubed-for-life. Its slim profile allows for a close cut, while the flat cutterbar angle minimizes soil contamination and extends blade life.

To accommodate the merger belt on each head, the machine incorporates KUHN's Lift-Control® hydropneumatic suspension system, which offers fast, easy adjustability and superior terrain-following capabilities. This reduces ash and soil incorporation, minimizes component wear and ensures clean, high-quality forage.

The KUHN FC 9830 D RA is now available through authorized KUHN dealers across North America.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
