KUHN MM 701 S and MM 890 S Self-Propelled Mounted Merger Heads

Kuhn North America is excited to introduce the KUHN MM 701 S and 890 S Merge Maxx® self-propelled mounting merger heads. With 24' and 30' of pickup in a single pass, these merger heads are the right size to enhance the productivity and efficiency of many haying operations. They are unique in the industry and unmatched in simplicity of operation, durability and merging capabilities. Designed for commercial operations with flat terrain common in the west, these merger heads improve comfort by bringing the work in front of the operator. The MM 701 S and MM 890 S merger heads are compatible with select self-propelled windrower models.

These merger heads have high-capacity pickups with integrated frames to treat crop gently yet have been built and tested for extreme usage. The proven split bearing design with wear guards and anti-wrap discs decreases the time needed for regular maintenance and improves pickup reliability. The floating windguard eliminates the need for operators to adjust when merging different crops or cuttings. KUHN's crop netting greatly limits leaf loss when transitioning onto the belt and into the windrow.

All KUHN self-propelled mounted merger heads now include easy to use technology and software. The IntelliMerge™ system allows an operator to run, adjust, and receive machine diagnostics and feedback on an intuitive color display. The optional OptiSense™ belt stall system alerts the operator to when the belts start to slow down when approaching the capacity of the merger. All functions of the machine, including the OptiSense™ belt stall detection system, are controlled from the ISOBUS terminal from the comfort of the cab.

Kuhn North America, Inc., of Brodhead, Wisconsin, is a leading innovator in agricultural and industrial equipment. KUHN offers a broad range of hay and forage, livestock, and crop production tools, as well as landscape and road maintenance equipment. KUHN, KUHN Knight and KUHN Krause products are sold by farm equipment dealers throughout the United States, Canada and many other countries.
